Vol.17, No.6, 1988, 509-528.

a guide to the IMS Bulletin: Volume 17 (1988)

No.1.....1-96 No.4.....309-364
No.2.....97-188 No.5.....365-432
No.3.....189-308 No.6.....433-528.

AAAS meeting: 14-19 January 1989, San Francisco, California ... 323, 442
Abstracts of papers presented in person
Boston, Massachusetts (27-30 March 1988) ... 23-34, 184
Madison, Wisconsin (16-18 May 1988) ... 104-111
Honolulu, Hawaii (15-17 June 1988) ... 125-139, 303
Fort Collins Colorado (14-18 August 1988) ... 218-246
Fort Collins Colorado (16-19 August 1988) ... 247-265
Abstracts of papers presented by title ... 93-96, 185-188, 304-308, 360-364, 429-432, 475-478
Acknowledgement of referees' services:

Abdunnabi, Ali and A.K.Md. Ehsanes Saleh.
Improved predictors in linear models with uncertain prior restrictions in a subspace, 203-19 (p. 27).
Abramson, Ian.
A recursive regression for high-dimensional models: Application to growth curves and repeated measures, 205-27 (p. 132).
Adams, Benjamin M. *see* Seaman, John W. Jr.
Adhikari, Ani.
Sample path analysis of downward skip free processes with subordinator input, 207-41 (p. 256).
Adler, André.
On the law of the iterated logarithm for nonidentically distributed random variables, 207-23 (p. 252).
Adler, André and Andrew Rosalsky.
Some generalized central limit theorems for weighted sums with infinite variance, 203-20 (p. 27).
Adler, Robert J.
Intersection local times for the Brownian density process and an infinite system of planar Brownian motions, 207-67 (p. 265).
Adler, Robert J., Stamatis Cambanis, and Gennady Samorodnitsky.
On stable Markov processes, 207-13 (p. 250).
Aerts, Marc and Jan C. Geertsema.
Bounded length confidence intervals in nonparametric regression, 206-37 (p. 227).
Agbeko, N.K.
On the domains of attraction of some monotonic functions: I-IV, 207-14 (p. 250).
Ahmad, Ibrahim and Subhash C. Kochar.
Testing whether F is "more IFR than G", 88t-13 (p. 96).
Testing for dispersive ordering, 88t-14 (p. 96).
Ahmed, S.E. and A.K.Md. Ehsanes Saleh.
Estimation strategies for the intercept vector in a simple linear multivariate normal regression model, 203-16 (p. 26).
Aki, Sigeo and Nobuhisa Kashiwagi.
Asymptotic properties of some statistics based on empirical distribution function, 205-12 (p. 127).
Akritas, Michael G.
A method for ranking censored data and a generalization of the rank transform, 205-40 (p. 136).
Akritas, Michael G. and Richard A. Johnson.
Symmetric approximate-scores two-sample tests with randomly censored data, 205-46 (p. 137).
Alam, M.S. and A.P. Basu.
A two-stage test for exponentiality against IFRA alternatives, 205-56 (p. 303).
Aldous, David J.
An outsider's view of extreme value theory, 207-9 (p. 249).
Anderson, T. W.
Asymptotic robustness in latent variable models, 206-104 (p. 246).
Arnold, Barry C.
Estimation in conditionally specified models, 206-61 (p. 233).

Arora, Sanjay *see* Srivastava, Jaya.
Arratia, Richard, Larry Goldstein, and Louis Gordon.
Two moments suffice for Poisson approximations: the Chen-Stein method, 204-23 (p. 109) and 205-21 (p. 131).
Arratia, Richard and Michael S. Waterman.
The Erdös-Rényi strong law for pattern matching with a given proportion of mismatches, 205-22 (p. 131).
Avram, Florin.
Sums with dependent indices and convergence to the Gaussian distribution, 203-14 (p. 26).
Avram, Florin *see also* Taqqu, Murad S.

Baddeley, Adrian J.
Stochastic geometry and image analysis, 207-62a (p. 263).
Bailer, A. John *see* Piegorsch, Walter W.
Balgopal, R. *see* Guess, Frank.
Balkema, A.A.
Monotone transformations for extremes, 207-42 (p. 257).
Balkema, A.A. and L. de Haan.
A convergence rate in extreme-value theory, 88t-41 (p. 308).
Bandyopdhyay, Dipankar and Asit P. Basu.
A test for bivariate exponentiality against BIFR alternatives, 206-40 (p. 227).
Bansal, Rakesh Kumar.
Robust sequential or fixed sample discrimination between two stochastic processes, 207-34 (p. 255).
Bar-Lev, Shaul K. and Daoud Bshouty.
Rational variance functions, 206-20 (p. 222).
Basak, Gopal K.
Stability and functional central limit theorems for degenerate diffusions, 88t-62 (p. 431).
Basawa, Ishwar V.
Large asymptotically quadratic dispersion, 207-47 (p. 258).
Bassan, Bruno and Marco Scarsini.
Convex orderings for stochastic processes, 207-31 (p. 254).
Bassett, Gilbert W. *see* Rousseeuw, Peter J.
Basu, A.P. *see* Alam, M.S.; Bandyopdhyay, Dipankar.
Bather, John A. and A. John Petkau.
A simple model for drug screening programs, 206-65 (p. 234).
Baxendale, Peter H.
Stability and statistical equilibrium for stochastic dynamical systems, 204-10 (p. 106).
Bechhofer, Robert E. and Pinyuen Chen.
A curtailed sequential procedure for subset selection of multinomial cells, 203-36 (p. 31).
Beirlant, J. and J.L. Teugels.
Asymptotics of Hill's estimator, 207-4 (p. 247).
Benhenni, Karim and Stamatis Cambanis.
Sampling designs for estimating the integral of stochastic processes, 207-12 (p. 249).
Beran, Rudolf J.
Refining bootstrap simultaneous confidence sets, 205-26 (p. 132).
Bergman, Bo and Bengt Klefsjö.
A family of test statistics for detecting monotone mean residual life, 88t-10 (p. 95).
Berliner, L. Mark.
Bayesian process design, 203-30 (p. 30).
Berliner, L. Mark, Prem K. Goel and Purushottam W. Laud.
Bayesian-like probing for global optima: an alternative to simulated annealing, 206-34 (p. 226).
Berman, Simeon M.
Sojourn times in a cone for a class of vector Gaussian processes, 207-10 (p. 249).
Berry, Donald A.
Adaptive allocations in clinical trials: comparisons with randomized controlled clinical trials, 205-33 (p. 134).

Bhapkar, Vasant P.
Generalized likelihood principle for inference in the presence of nuisance parameters, 88t-6 (p. 94).
On the generalized likelihood principle for inference, 88t-7 (p 94).
Bhat, U. Narayan *see* Lal, Ram.
Bhattacharjee, M.C. and Jayaram Sethuraman.
Families of life distributions characterized by two moments, 88t-49 (p. 362).
Bhattacharya, P.K.
Treatment-covariate interaction in observational studies, 205-29 (p. 133).
Bhaumik, Dulal Kumar and Thomas Mathew.
Nonrandomized designs and D-optimality, 203-41 (p. 32).
Booth, James G.
Weighted conditional least squares estimation, 207-33 (p. 254).
Boothroyd, Derek B. and George P.H. Styan.
On some properties of balance and imbalance for block effects in BIB designs (preliminary report), 205-38 (p. 135).
Bradley, Richard C.
A caution on mixing conditions for random fields, 88t-40 (p. 308).
Brillinger, David R.
Maximum likelihood approaches to some random process problems in neurophysiology and seismology, 205-19 (p. 130).
Bshouty, Daoud *see* Bar-Lev, Shaul K.
Bucklew, James A.
Quick simulation, 204-30 (p. 111).
Buja, Andreas *see* Tibshirani, Robert.
Burdzy, Kryzsztof.
Some Brownian path properties, 207-66 (p. 265).
Burton, Catherine.
Current design issues in clinical trials, 206-81 (p. 238).

Cambanis, Stamatis.
Sampling designs and estimators for time series, 204-21 (p. 109).
Cambanis, Stamatis *see* Benhenni, Karim and Adler, Robert J.
Carlstein, Edward.
Nonparametric change-point estimation, 206-6 (p. 219).
Weak convergence results for the subseries values of a general statistic from a stationary sequence, 207-5 (p. 248).
Carmichael, Jean-Pierre, Jean-Claude Massé, and Radu Theodorescu.
Multivariate reciprocal processes in the Gaussian stationary case, 207-30 (p. 254).
Cartwright, Donald L. and Stanley A. Sawyer.
Harmonic functions, Martin boundaries, and Radon transforms for random walks on trees, 204-2 (p. 104).
Casella, George and Laura Strang.
Empirical Bayes Crop Prediction, 203-28 (p. 29).
Chaganty, N.R. and Sanjeev Sabnis.
Multidimensional large deviation local limit theorems for ratio statistics, 207-54 (p. 259).
Chakraborti, S. and M. M. Desu.
Generalizations of Mathisen's median test for comparing treatments with a control, 203-33 (p. 30).
Chakravarti, I.M.
Pseudo-random arrays and Stanton-Sprott difference sets and their use as codes and designs, 206-97 (p. 243).
Chan, K.S. and Howell Tong.
On a likelihood-ratio test for thresholds in time series, 88t-21 (p. 187).
Chanda, Kamal C.
Asymptotic expansion of the probability of misclassification for a K_n– nearest neighbour type discriminant rule, 206-24 (p. 223).

Chang, I-Shou and Chao Agnes Hsiung.
Martingale approach to parametric censored data, 205-5 (p. 126).
Finite sample optimality of maximum partial likelihood estimation in Cox's model for counting processes, 206-14 (p. 221).
Charras, Alec and Constance van Eeden.
Bayes and admissibility properties of estimators in truncated parameter spaces, 88t-54 (p. 364).
Chen, Chao-lung.
Estimation problems in group testing, 203-45 (p. 33)
Chen, Chen-Hsin.
Resampling methods in Cox's regression estimation, 205-23 (p. 131).
Chen, Hung.
Estimation of a projection pursuit type regression model, 204-15 (p. 107).
Chen, Pinyuen *see* Bechhofer, Robert E.
Cheng, Cheng *see* Kaigh, W.D.
Chikuse, Yasuko.
Top-order invariant polynomials: construction and statistical applications, 203-5 (p. 24).
Some results in multivariate distribution theory, 204-8 (p. 105).
Some properties and applications of the invariant polynomials in matrices, 206-78 (p. 237).
Choi, Sungsub and W.J. Hall.
On asymptotically locally optimal tests, 88t-51 (p. 363).
Chow, Mo-suk and Qiqing Yu.
Minimaxity of the empirical distribution function in invariant problem, 203-37 (p. 31).
Clayton, Murray K.
Covariate models for Bernoulli bandits, 206-11 (p. 220).
Cline, Daren B. H.
A Tauberian theorem relating the smoothness of an integrable function to the tail behavior of its Fourier transform, 203-50 (p. 34).
Clogg, Clifford C.
Association models and graphical methods for the analysis of multiple contingency tables, 203-29 (p. 29).
Cox, Dennis D. *see* Koh, Eunmee.
Cressie, Noel A.C.
Modeling tumor growth with random sets, 204-5 (p. 105).
Crovelli, Robert A.
Applied probability theory of petroleum play analysis, 207-52 (p. 259).

Dalal, S.R., J.H.B. Kemperman, and C.L. Mallows.
Some moment inequalities involving generalized convex functions, 206-36 (p. 226).
Dargahi-Noubary, G.R.
On tail estimation – an improved method, 207-44 (p. 257).
Darling, R.W.R.
Infinite-dimensional stochastic difference equations for particle systems and network flows, 207-56 (p. 260).
Das, K., Q. Meneghini, and N.C. Giri.
On inadmissibility of a ratio of variance components, 88t-1 (p. 93).
Davis, Linda June.
Intersection-union tests for testing strict collapsibility in three-dimensional contingency tables, 203-3 (p. 23).
Davis, Richard A. and Sidney I. Resnick.
Basic properties and prediction of Max-ARMA processes, 207-64 (p. 264).
de Acosta, Alejandro.
Large deviations for Markov processes, 204-24 (p. 110).
de Haan, L. *see* Balkema, A.A.
de la Peña, Victor H.
L-bounds for martingales and U-statistics in terms of L-norms or sums of independent random variables, 203-35 (p. 31).

Deely, John J.
Hierarchical Bayesian models for selecting the best growth process, 206-73 (p. 236).
DeGroot, Morris H. *see* Goel, Prem K.
Desu, M.M. *see* Chakraborti, S.
Devroye, Luc.
An L_1-asymptotically optimal estimate, 205-51 (p. 139).
Dey, Dipak K.
On estimating eigenvalues in a two-sample problem, 88t-2 (p. 93).
Estimation of parameters in mixture distributions, 88t-72 (p. 476).
Dey, Dipak K. and Alan E. Gelfand.
Improved estimation of a patterned covariance matrix, 88t-3 (p. 93).
Dey, Dipak K. and Lynn Kuo.
A new empirical bayes estimator with type II censored data, 88t-71 (p. 476).
Diaconis, Persi *see* Fill, James Allen.
DiCiccio, Thomas J. and Joseph P. Romano.
Accurate bootstrap confidence limits: the automatic percentile method, 206-68 (p. 235).
Ding, Cherng George.
Computational tools for interval testing, 88t-28 (p. 305).
Doney, R.A.
Last exit times for random walks, 207-8 (p. 248).
Donoho, David L. and Miriam Gasko.
Multivariate generalizations of the median and trimmed mean, I, 88t-8 (p. 95).
Multivariate generalizations of the median and trimmed mean, II, 88t-9 (p. 95).
Donoho, David L. and Richard C. Liu.
Geometrizing rates of convergence – III, 88t-15 (p. 185).
Asymptotic minimax risk in density estimation, 205-55 (p. 303).
Donoho, David L. *see* Fan, Jianquing.
Dubins, Lester *see* Shepp, Lawrence A.
Dudewicz, Edward J. and Vidya S. Taneja.
The multivariate heteroscedastic method with simplified sampling, 205-31 (p. 134).
DuMouchel, William.
Automated model checking for multiple regression, 203-44 (p. 33).
Dupuis, Paul.
Large deviation theorems for processes with Lipschitz paths, 204-14 (p. 107).
Durrett, Richard T.
Contact processes with several types of particles, 204-12 (p. 107).

Eaton, Morris L. and David E. Tyler.
On the asymptotic distribution of the eigenvalues of a random symmetric matrix, 206-8 (p. 219).
Ellis, Steven P. and Stephan Morgenthaler.
A metric representation for minimum chi-squared, 204-19 (p. 108).
El-Neweihi, E. and F.C. Meng.
On L-superadditive structure functions, 88t-74 (p. 477).
Engel, Joachim.
Density estimation with Haar series, 205-50 (p. 138).
Ethier, Stewart N. and Robert C. Griffiths.
The sampling distribution for the neutral two-locus model, 204-16 (p. 108).

Fan, Jianquing and David L. Donoho.
Nonparametric estimation of quadratic functional in Gaussian white noise 205-58 (p. 303).
Faraway, Julian and Myoungshic Jhun.
Bootstrap choice of bandwidth for density estimation, 203-51 (p. 34).
Farahmand, K.
Interesting results of the number of crossings of a random polynomial, 207-60 (p. 262).
Fellman, Johan *see* Nordström, Kenneth.

Feuerverger, Andrey.
Some new perspectives on the MLE and LRT, 203-32 (p. 30).
On the empirical saddlepoint approximation, 205-57 (p. 303).
Fill, James Allen and Persi Diaconis.
Strong stationary times for Markov processes via a new form of duality, 207-63 (p. 264).
Firth, David.
Marginal homogeneity and the superposition of Latin squares, 206-17 (p. 221).
Fisch, Robert and David Griffeath.
One-dimensional cyclic cellular automata, 204-17 (p. 108).
Flournoy, Nancy.
Challenges, problems and practice, 205-44 (p. 137).
Fong, Duncan K.H.
A hierarchical Bayesian estimator of the larger of two related means, 206-96 (p. 243).
Foster, Dean.
Conditional least squares methods in continuous time stochastic processes, 203-49 (p. 34).
Frangos, Nikos E. and Peter Imkeller.
The continuity of the quadratic variation of two-parameter martingales, 207-39 (p. 256).
Fraser, Donald A.S.
Conditional inference: the use of pivotal or direct methods, 205-47 (p. 137).
Frees, Edward W.
Trimmed slope estimates for simple linear regression, 204-3 (p. 104).
Fujikoshi, Yasunori.
Error bounds for asymptotic expansions of the multivariate t- and F-distributions with common denominator, 206-92 (p. 241).

Gani, Joseph M.
Modelling the AIDS epidemic, 205-39 (p. 136).
Gardiner, Joseph C. and V. Susarla.
The performance of a sequential procedure for the estimation of the median survival time with specified accuracy, 203-42 (p. 32).
Gasko, Miriam, *see* Donoho, David L.
Gastwirth, Joseph L. and Patricia A. Hammick.
Estimation of the prevalence of a rare disease preserving the anonymity of the subjects by group testing, 205-41 (p. 136).
Gaver, D.P., and P.A. Jacobs.
Statistical estimation of measures of performance for queues, 207-51 (p. 259).
Geertsema, Jan C. *see* Aerts, Marc.
Gelfand, Alan E. *see* Dey, Dipak K.
Gersch, Will *see* Kitagawa, G.
Ghorai, J.K.
Nonparametric Bayesian estimation of survival function under proportional hazard model, 205-25 (p. 132).
